

Decreasing Email Unsubscribe Rate

Script:

This is easy.. first... you could give a lot of value... and then.. the only people who leave are the ones who are not interested in what you give.. meaning.. they aren't prospects..

Second, you could add a form before they unsubscribe to find out the reason why they did...

Third, you could give them a last goodbye email to try to save them with a lot of value...

And lastly... you can detect when they have low engagement and try to change topics to see what they show interest in... but that requires automations... and it's too much complexity in my opinion...

That is all there is to it... start working on it.
