

Increase Lead Magnet CVR

Topic Points:

- Making a good optin
- Making the basic opt-in
- Basic opt-in doesn't work? You got two options..
 - create a "big optin page"
 - create a resource to warm them up without needing to opting in

Script:

The first way is to make a good opt-in.. this involves making better stuff.. and this is by far what most affects conversions...

Then we have an optin page... I like to keep this simple.. but if you want to increase the conversions and simple opt-in pages don't work... we make a big one...

This comes down to making it in the same way you do a sales page.. and give it for free... remember...giving their email and name is a commodity.

And if this doesn't work... we need to bring out the big guns...

Create a free resource, preferably a video, that is REALLY badass for them to watch the full thing, then after they are warmed up... opt-in rates will be huge... and the leads you lose in the video weren't interested anyways...

And just to be sure... you add an exit triggered popup with a quick newsletter signup.

Alright very short... But... GET. TO. WORK. All these sound simple but take a huge ammount of time to do... a little to explain.
