# TIMELINE

As I told in the video series... your prospect evolves and so should your understanding of him.

Nobody is doing this... but if you want to understand your prospect...

You have to go to their timeline... I'll give you a *starting point* and you go more granular on the timeline over time.

**Before they knew your business**

**After they consumed some content**

**After they opted-in**

**After being in email for a while**

**After one consultation**

**After being with you for a long time**

# NOTES

This is ordered from top to bottom... the top slots to fill are the most important... while the bottom slots are the least...

All examples I put in were based on actual research I did... so don't worry about their authenticity.

But you should still do your research if you consider your business to be "diferent" then most of the niches out there.

**It does not  
save!!!**

The textboxes you can fill up aren't saved anywhere, after you reload the pdf they disapear... it's purely for idealization.. please edit the pdf in an online pdf editor like sejda (free)
