

Why You Should Have A Sale After The Opt-In

The opt-in is where all the people in your funnel pass through

And usually... premium clients are in here.. unless it's by referral... but usually these want to be given an offer NOW upfront...

And that is where the sale after the opt-in comes in... make it a price such as 24\$ or something...

The key is... this just creates cash upfront... and this will make it so customers pay for themselves.. and filter out good leads from bad leads...

This steps a bit into the business.. so go watch my video named "got business problems" for more on that.
